

The logo consists of the word "PRIME" in a white, uppercase, sans-serif font, centered within a solid blue rectangular background.

PRIME

A low-angle photograph of a modern building's exterior. The left side features a white, diamond-patterned metal mesh facade. The right side shows horizontal wooden slats. The sky is blue with light clouds. A large blue rectangle is overlaid on the bottom right of the image, containing the title and date.

Carbon Reduction Policy

April 2019

Improving efficiencies

Prime embraces the Department of Environment and Climate Change strategy for low carbon industry in the UK and is committed to becoming a Low Carbon Business through its policies and procedures.

— Why work with Prime?

Energy Management activities are subject to periodic reviews through the internal HS&E audit team. Environmental Committee Meetings and Annual Management Review

This Policy will be reviewed annually as part of the Management Review process.

Action Plan

The action plan for carbon management activities will be reviewed and revised as part of our Annual Management Review.

Leighton Chumbley
Chief Executive

This policy supports the Group's Health & Safety and Environment (HS&E) Policies.

The company strives to maintain best practice, seeking continuous improvement and innovation within all Group businesses and activities. This is achieved by reviewing the Key Performance Indicators, the setting of objectives and targets and the implementation of its Health and Safety and Environment Management Systems, with Group companies certified to BS EN ISO 14001:2004 Environment and BS OHSAS18001:2007 Occupational Health and Safety.

This policy will be delivered by raising awareness and gaining the commitment of management, employees and other stakeholders, and will be implemented through the Group's HS&E Management Systems.

Energy and Fuel Policy

Prime's policy is to identify and act on opportunities to improve energy efficiency, and reduce both financial and energy wastage, thus making a positive contribution to profits and reducing the company's adverse impact on the environment.

As part of our environmental strategy, we are committed to the cost-effective management of energy and will practice and promote energy efficiency in all our premises.

We will manage the fuel consumption of our vehicles, plant and equipment, and promote energy efficient manufacturing and conversion processes, all leading to reduced resource waste.

The Chief Executive has lead responsibility for policy implementation within the Group.

Prime aims to:

- Reduce energy consumption across the business through a range of actions including improved measurement and monitoring; energy awareness and switch off campaigns; selection of energy efficient plant and equipment, and energy auditing.
- Reduce fuel consumption through the selection of fuel efficient vehicles; a routine maintenance programme to ensure ongoing vehicle efficiency; fewer journeys through inter-company cooperation and vehicle sharing, and awareness and training programmes.
- Reduce embedded carbon in our products by reducing waste and efficient fuel and vehicle use.
- Measure and control fuel and energy consumption
